Points of Discussion for Interview:

- Applicant believes attached amendment may overcome the U.S.C. 112 objection.
- Applicant believes that "enabling an interrupt" differs from a "failed link".
- Applicant believes Bales only teaches actions predicated upon a link which fails unexpectedly.
- Applicant believes there is a distinction between a failed link and an enabled interrupt.
- Applicant further believes that when a link fails unexpectedly, Bales only discloses transferring active channels from the failed link, and not from each analog channel.
